

POLYKOAT STAIN

COLOR CHART

PolyKoat Stain™ is a translucent, UV stable dye, formulated using color designed to penetrate interior cementitious surfaces. It creates a unique, multi-colored translucent color scheme that unlike paints, will not crack, chip, or peel. PolyKoat Stain™ can be combined to create an unlimited color palate that creates a beautiful marble effect, when used properly. Create the look of a beautiful, custom stained floor in about 1/3 of the time of other methods.

10 great standard colors give a wide variety to choose from.

Can be coated with PolyKoat GL coatings or other urethanes.

Provides a beautiful stained effect similar to acid stains and will not fade under UV rays.

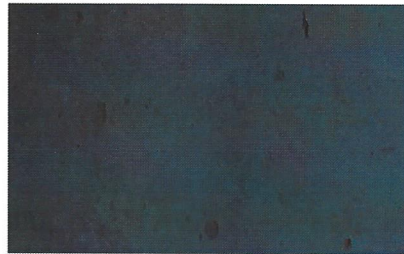

Penetrates deep. Quick return to service.

PRELIMINARY COLOR CHART

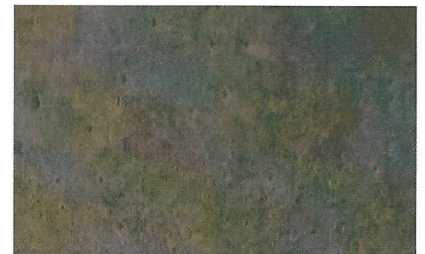

Be advised information and color samples may change.

Watch for updated versions.

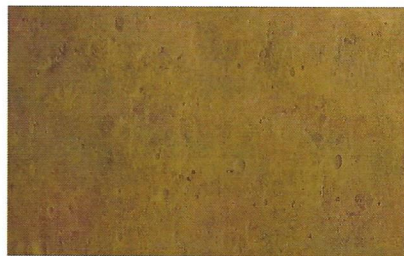

Due to variations in concrete composition, age, surface conditions, surface preparation, and application techniques, exact color will vary from project to project.
